Using Task-Based Learning Approach and Drama to Improve Communicative Competence for Students at Pibulsongkram Rajabhat University

Andrew Lee Sweeney
Dr. Taweesak Kunyot
Dr. Aree Preedeekul

Abstract

Communicative competence is a linguistic term, first brandished by Dell Hymes, that is used to assess a person's capability in using a language. Task-based learning is a student centred methodology that is sporadically used at tertiary levels across Asia. This paper aims to investigate the combination of using task-based learning and drama and its effects on student's communicative competence and to examine student's perceptions towards learning English by using task-based learning and drama. Students endured 8 weeks of drama lessons under the task-based framework and assessed under criteria, pre and post questionnaires and interviews. The findings revealed that students' communicative competence significantly increased and a positive perception was attained by using task-based learning and drama. The findings of the study provide researchers and teachers with theoretical and practical information and approaches that can assist further research and teaching approaches.

I am eternally grateful to Dr. Taweesak Kunyot for his expertise and advice throughout the construction and completion of this thesis. Furthermore, I truly appreciate the knowledge gained in the linguistic field from your teaching. Additionally, I would like to thank Dr. Aree Preedeekul for her added support in this thesis. I would also like to offer a thank you to Assistant Professor Dr. Nikom Nak Ai for his statistical expertise, knowledge and help.

I would extend further appreciation to the English major students at Pibulsongkram Rajabhat University for their cooperation for this study. Thank you to the university lecturers who offered knowledge, help and encouragement through the duration of this study and to Ajarn Tanamolyaprut Suktanani pasiri with your assistance in audiovisual computer technology.

Finally, I would like to add a very special thank you to my family, Beryl and the late Brian Sweeney for your teaching, love, encouragement and eternal support. Moreover, a momentous thank you to my better half, Chanitnapak Khumim for your help, tolerance, full support in difficult times and being the inspiration behind me to succeed in the completion of this work.
